non-commercial use.

- 1) Cut out and fully separate the pentagons on each sheet.
- 2) Punch out all the holes for the pencils. Widen each hole with a pencil.
- 3) Tape the pentagons together to form a dodecahedron. Be sure to have the image on the outside of each pentagon!
- 4) Push the pencils through each hole and its match on the exact opposite face of the dodecahedron.
- 5) When all 30 pencils are woven together, remove each face of the dodecahedron, one at a time, and rubber-band together the pencils that went through that face.
